

Project Profile

Modified Asphalt Roof

Project Specifications:

- ◆ Manhattan, NY
- ◆ Smooth Asphalt
- ◆ Approx. 2,000 SF

A full fabric, 45mil system creating a seamless, flexible, renewable membrane

About the project:

One of many worn and leaking roofs in NYC that was saved with the Acrylabs system by avoiding a costly tear off. With the use of the Acrylabs products, this roof no longer has ponding water, no leaks, and stays cool, saving up to thousands of dollars on energy bills.

Acrylabs Asphalt Emulsion applied to all low spots

Sealed with Fabric Reinforcement around all bulkheads, parapet walls, and pipes
