

Project Profile

# Residential Deck Project

Installing 12" fabric around perimeter and details

## Project Specifications:

- ◆ Clifton, NJ
- ◆ Existing fiberglass with peeling paint
- ◆ Approx. 15'x20'

## About the project:

This project was completed by a New York contractor on a residential deck project in Clifton, New Jersey. It had a failing fiberglass system with peeling paint. The contractor scraped off the peeling paint, power washed clean, then applied Acrylabs Base System and DEK-coat finishes.

Installing Acrylabs Base System

Using Brushable Sealant to smooth out the blemishes

## DEK-coat finishes applied
